

Osman Khan

Lab 2 Report

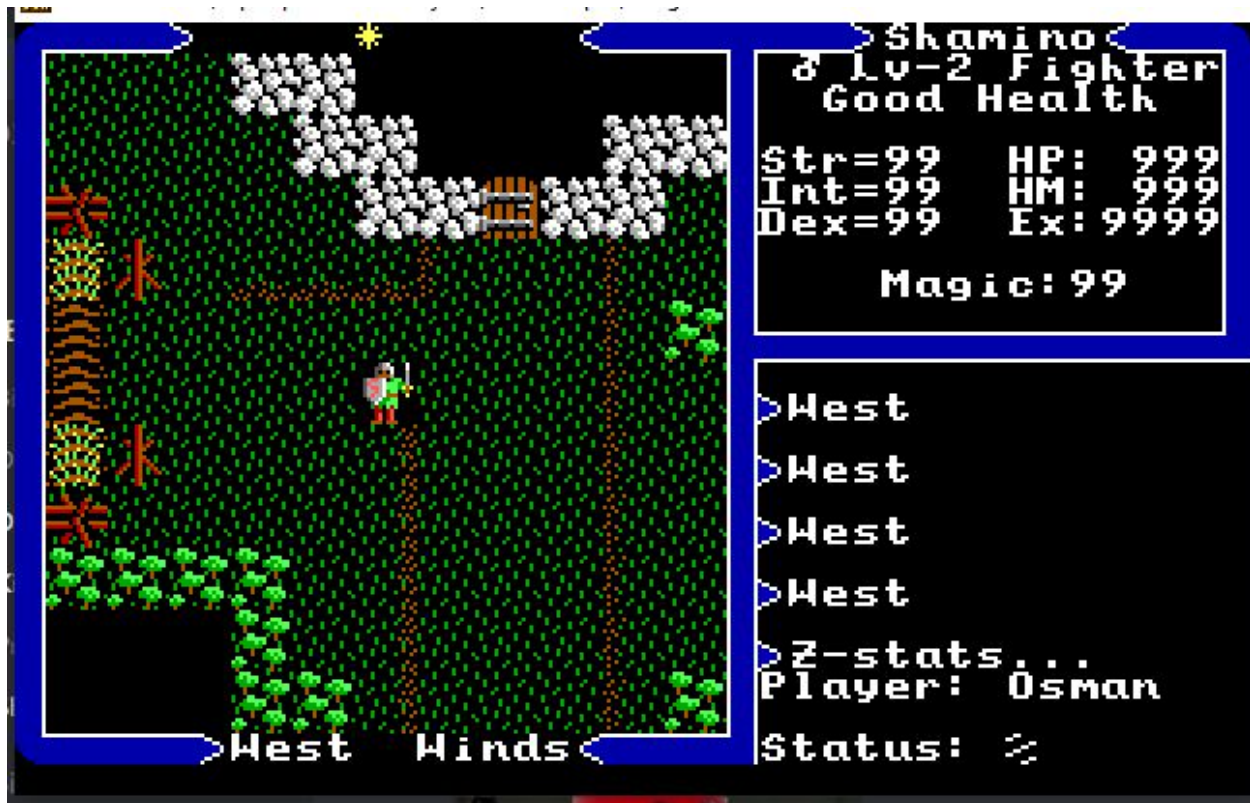

I used the HxD hex editor to edit the SAVED.GAM file located in the Ultima folder in order to edit the character stats and item count in game. The way I determined which file to alter was finding the save file in the Ultima folder and seeing it had the characters' names as the decoded text. Once I converted the file to display the offsets in sets of 32 bytes and changed the view of the file to DOS/IBM-ASCII (OEM) it became more apparent what offsets to edit. I noticed the first two offsets for the main character were unused, or used for some other purpose, and the same was applied to all characters. There was a symbol for the character's gender and the following offset matched the character's strength, intelligence, dexterity, and other character related stats. Some values were only a single byte such as strength, but values such as health points were a word and took up 2 bytes of space which allowed it to be a value greater than 255. This pattern was the same for every character and I replicated it for the entire party. Once I had completed the characters stats for everyone I moved on to the next line of offsets. This started on the offset 200 and I kept the pattern of the first two offsets being unused or used for something else. From there I saw what values could possibly represent the gold my party had. Once I found where it was located it was also a word that included two bytes. From there I located where the other item representations could be through trial and error. The Black Badge was more tricky because it wasn't a numbered item, but something the party has or doesn't. Once I learned where it was located in the offset I set it to the max value for a single byte.

Screenshots

Player Character stats:

Shamino stats:

The image shows a game interface with a map on the left and a stats panel on the right. The map depicts a character standing in a landscape with green terrain, brown paths, and white rocky areas. The stats panel for Shamino shows the following information:

Shamino	
♂	lv-2 Fighter
Good Health	
Str=99	HP: 999
Int=99	HM: 999
Dex=99	Ex: 9999
Magic: 99	

Below the stats panel, there is a list of items or locations:

- > West
- > West
- > West
- > West
- > z-stats...

At the bottom of the stats panel, it says "Player: Osman" and "Status: ⚡".

Party Stats:

The image shows a game interface with a map on the left and a party stats panel on the right. The map depicts a character standing in a landscape with green terrain, brown paths, and white rocky areas. The party stats panel shows the following information:

Party Stats	
Osman	9999G
Shamino	9999G
Iolo	9999G
Mariah	9999G
Geoffrey	9999G
Jaana	9999G
F: 63	G: 9999
4-5-139	

At the bottom of the stats panel, there is a large empty space with a blue border.

Keys and Gems:

Skully Keys Magic Carpet and Black Badge:

Magic Axes:
